

CAPACITY ALERT & PREVENTION SYSTEM (CAPs)

REAL-TIME INSIGHTS ON PEOPLE CLUSTERING.

CAPACITY ALERT & PREVENTION SYSTEM Von Technologies offers a cloud-based data collection platform that provides real-time empirical data to ensure the health and safety of students and faculty. This is accomplished by monitoring and proactively alerting staff according to “Social Distancing” guidelines. The platform detects each student and guests location within the campus and sends alerts in real-time to responsible parties including security guards, faculty, and managers.

Help your students and faculty adhere to safe social distancing.

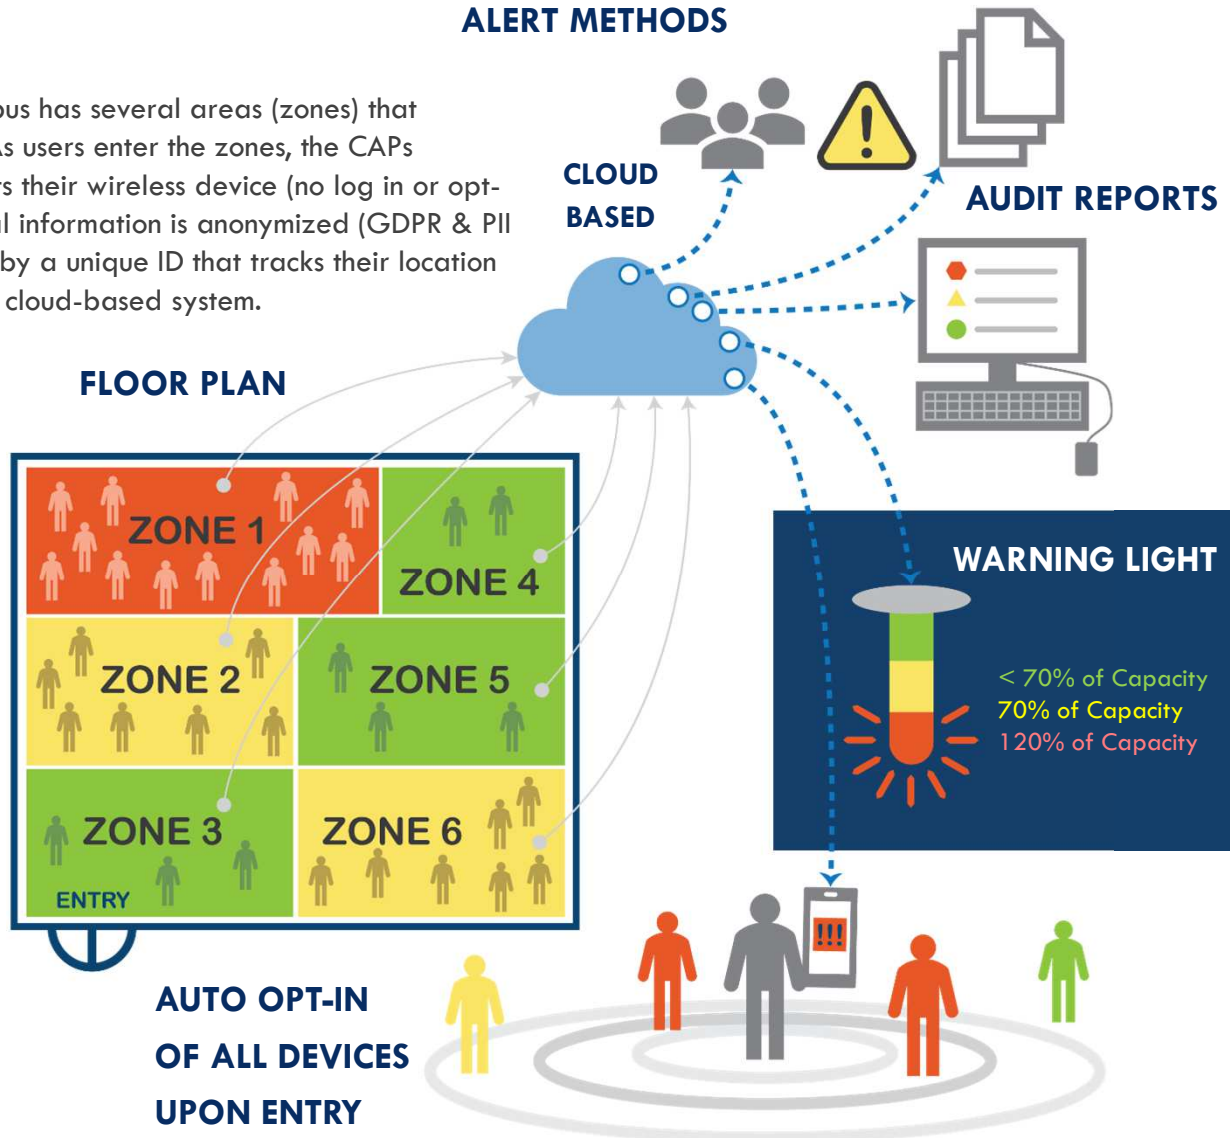

HOW IT WORKS A campus has several areas (zones) that students and guest visit. As users enter the zones, the CAPs systems seamlessly detects their wireless device (no log in or opt-in needed). Their personal information is anonymized (GDPR & PII compliant) and replaced by a unique ID that tracks their location within the campus via our cloud-based system.

CAPs Sends alerts in real-time over the network to intended parties, campus app, digital signage, dashboard or light bar

Reports identify areas needing changes in floor plan, staffing, inventory

Audit trails show compliance with enforcement of regulatory ordinances

DIFFERENT SOCIAL DISTANCING ALERT METHODS

CAPACITY ALERT & PREVENTION SYSTEM (CAPs)

REAL-TIME INSIGHTS ON CUSTOMER CLUSTERING.

BENEFITS

- **Best Practices guidelines enforcement & accountability**
- Safer & healthier environment for students & faculty
- Uses predictive model to alert when occupancy may be exceeded
- Journals of events to evaluate repeated conditions to continuously improve student & faculty safety
- Audit trails to comply with regulatory ordinances
- Closed Loop system to record actions taken to remedy breach
- Foot traffic data and student/guest behavior pattern recognition
- Customized notifications via defined preferences
- Risk mitigation – ensure your students are practicing social distancing
- Strategic business intelligence beyond COVID-19

Staying home saves lives.
But we want to be back together. Safely.
CAPs provides safe social distancing.
And helps people get back to work.
Back to life. Back to normal.
CAPs helps quickly respond to a new
set of expectations.
